JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

ADC(3)
Theoretical and experimental studies of the valence photoemission spectrum of propionitrile 149
Ag(111)
Application of differential charging for analysis of electronic properties of supported silver 7
Amorphous solid
Application of (e,2e) spectroscopy to the electronic structure of valence electrons in crystalline and amorphous solids 99
Aromatic anhydride
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75
Atomic charge
On the determination of atomic charge via ESCA including application to organometallics 41
Auger peak
The normalization of ejected-electron spectra using Auger peaks 277
Auger photoelectron spectroscopy
Auger photoelectron coincidence studies of the origin of the three-hole final state contribution to the Ni L_3VV Auger line 283
Autoionization spectroscopy
Autoionization spectroscopy of CO on metal oxide surfaces 155

Binding energy
Application of differential charging for analysis of electronic properties of supported silver 7
Bis(pyridyl)butadiyne
Electronic structure of some pyridylacetylenes studied by He I photoelectron spectroscopy: a weak orbital interaction between the nonbonding electron pair on the nitrogen atom and the in-plane π orbital in the ethynyl group 267
Bond length
Determination of bond lengths of polyatomic species using vibrational frequencies 183
Bonding configuration
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75

C1s $\rightarrow 2\pi^*$ excitation
Autoionization spectroscopy of CO on metal oxide surfaces 155
Cadmium
The normalization of ejected-electron spectra using Auger peaks 277
Carbide bond
The polyimide (PMDA–ODA) titanium interface. Part 3. A theoretical study 209
Carbon monoxide adsorption
Coherent forward emission (CFE) from adsorbed molecules: $(\sqrt{3} \times \sqrt{3})R30°$ CO/Pd(111) and $(2 \times 1)CO + O/Pd(111)$ 33
Carbon
Application of (e,2e) spectroscopy to the electronic structure of valence electrons in crystalline and amorphous solids 99
Chemisorbed oxygen
Spin resolved photoemission study of oxygen on thin cobalt films 197
CO
Autoionization spectroscopy of CO on metal oxide surfaces 155
Co/W(100)
Spin resolved photoemission study of oxygen on thin cobalt films 197
Coherent forward emission
Coherent forward emission (CFE) from adsorbed molecules: $(\sqrt{3} \times \sqrt{3})R30°$ CO/Pd(111) and $(2 \times 1)CO + O/Pd(111)$ 33
Conductivity
Application of differential charging for analysis of electronic properties of supported silver 7
Correlation satellite
High-resolution study of the correlation satellites in photoelectron spectra of the rare gases 241
Coster–Kronig decay
Lineshape asymmetry parameters in X-ray photoelectron spectra 15

Coster–Kronig process
Auger photoelectron coincidence studies of the origin of the three-hole final state contribution to the Ni L_3VV Auger line 283
Crystalline solid
Application of (e,2e) spectroscopy to the electronic structure of valence electrons in crystalline and amorphous solids 99
Cu^+ impurity
Hartree–Fock study on the lower excited states of a Cu^+ impurity in NaF using large embedded clusters 143

Delocalization
Hartree–Fock study on the lower excited states of a Cu^+ impurity in NaF using large embedded clusters 143
Differential charging
Application of differential charging for analysis of electronic properties of supported silver 7
Dispersion effect
Spin resolved photoemission study of oxygen on thin cobalt films 197

(e,2e) Spectroscopy
Application of (e,2e) spectroscopy to the electronic structure of valence electrons in crystalline and amorphous solids 99
Ejected-electron spectrum
The normalization of ejected-electron spectra using Auger peaks 277
Electron energy-loss spectroscopy
XPS and EELS study of a quasicrystalline $Al_{70}Pd_{20}Mn_{10}$ alloy 233
Electron spectroscopy for chemical analysis
On the determination of atomic charge via ESCA including application to organometallics 41
Electronic structure
Application of (e,2e) spectroscopy to the electronic structure of valence electrons in crystalline and amorphous solids 99
SCF-X_α-SW and X-ray emission study of the electronic structure of some phosphorus compounds 291
Embedded cluster
Hartree–Fock study on the lower excited states of a Cu^+ impurity in NaF using large embedded clusters 143
Ethylene
Application of differential charging for analysis of electronic properties of supported silver 7
Ethynylpyridine
Electronic structure of some pyridylacetylenes studied by He I photoelectron spectroscopy: a weak orbital interaction between the nonbonding electron pair on the nitrogen atom and the in-plane π orbital in the ethynyl group 267
Eu intermetallic compound
Electronic structure study of Eu intermetallic compounds by photoelectron spectroscopy 173

Ferrite
Formation of manganese- and manganese,zinc-bearing ferrites by oxidation of aqueous suspensions and analysis of their cation distributions 221
Fourier transform spectroscopy
Fourier transform photoemission spectroscopy 1

Green's function
Theoretical and experimental studies of the valence photoemission spectrum of propionitrile 149

Hartree–Fock
Hartree–Fock study on the lower excited states of a Cu^+ impurity in NaF using large embedded clusters 143
High resolution HE I photoelectron spectroscopy
Theoretical and experimental studies of the valence photoemission spectrum of propionitrile 149

Intermetallic compound
Electronic structure study of Eu intermetallic compounds by photoelectron spectroscopy 173

Lanthanon compound
Electronic structure study of Eu intermetallic compounds by photoelectron spectroscopy 173
Lineshape asymmetry parameter
Lineshape asymmetry parameters in X-ray photoelectron spectra 15
Low energy electron diffraction
Spin resolved photoemission study of oxygen on thin cobalt films 197

Manganese,zinc-bearing ferrite
Formation of manganese- and manganese,zinc-bearing ferrites by oxidation of aqueous suspensions and analysis of their cation distributions 221
Manganese-bearing ferrite
Formation of manganese- and manganese,zinc-bearing ferrites by oxidation of aqueous suspensions and analysis of their cation distributions 221
Metal oxide surface
Autoionization spectroscopy of CO on metal oxide surfaces 155
Modification of surface magnetism by adsorbed atoms
Spin resolved photoemission study of oxygen on thin cobalt films 197

Mössbauer spectrum
Formation of manganese- and manganese,zinc-bearing ferrites by oxidation of aqueous suspensions and analysis of their cation distributions 221

NaF
Hartree–Fock study on the lower excited states of a Cu^+ impurity in NaF using large embedded clusters 143
Napthalene-3,4-dicarboxylic anhydride
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75
Ni(111) surface
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75
Non-bonding electron pair
Electronic structure of some pyridylacetylenes studied by He I photoelectron spectroscopy: a weak orbital interaction between the nonbonding electron pair on the nitrogen atom and the in-plane π orbital in the ethynyl group 267
Normalization
The normalization of ejected-electron spectra using Auger peaks 277

O/Co/W(100)
Spin resolved photoemission study of oxygen on thin cobalt films 197
OD-EPRS
Hartree–Fock study on the lower excited states of a Cu^+ impurity in NaF using large embedded clusters 143
O/Ni(111) surface
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75
Organometal
On the determination of atomic charge via ESCA including application to organometallics 41
Oxidation
Initial oxidation of the Sc-on-Al(111) system, as studied by photoelectron spectroscopy 25

Phase-correlated wave train
Fourier transform photoemission spectroscopy 1
Photoelectron diffraction
Coherent forward emission (CFE) from adsorbed molecules: $(\sqrt{3} \times \sqrt{3})R30°$ CO/Pd(111) and $(2 \times 1)CO + O/Pd(111)$ 33
Photoelectron spectroscopy
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75
Electronic structure of some pyridylacetylenes studied by He I photoelectron spectroscopy: a weak orbital interaction between the nonbonding electron pair on the nitrogen atom and the in-plane π orbital in the ethynyl group 267
Electronic structure study of Eu intermetallic compounds by photoelectron spectroscopy 173
Fourier transform photoemission spectroscopy 1
Photoelectron spectrum
High-resolution study of the correlation satellites in photoelectron spectra of the rare gases 241
PMDA–ODA
The polyimide (PMDA–ODA) titanium interface. Part 3. A theoretical study 209
Polyatomic species
Determination of bond lengths of polyatomic species using vibrational frequencies 183
Polyimide
The polyimide (PMDA–ODA) titanium interface. Part 3. A theoretical study 209
Potential energy distribution
Determination of bond lengths of polyatomic species using vibrational frequencies 183
Propionitrile
Theoretical and experimental studies of the valence photoemission spectrum of propionitrile 149

Quasicrystal
XPS and EELS study of a quasicrystalline $Al_{70}Pd_{20}Mn_{10}$ alloy 233

Rare gas
High-resolution study of the correlation satellites in photoelectron spectra of the rare gases 241

Sc-on-Al(III) system
Initial oxidation of the Sc-on-Al(111) system, as studied by photoelectron spectroscopy 25
SCF calculation
The polyimide (PMDA–ODA) titanium interface. Part 3. A theoretical study 209
SCF-X_α-SW
SCF-X_α-SW and X-ray emission study of the electronic structure of some phosphorus compounds 291
Shake-up/shake-off process
Auger photoelectron coincidence studies of the origin of the three-hole final state contribution to the Ni L_3VV Auger line 283
Silicon
Application of (e,2e) spectroscopy to the electronic structure of valence electrons in crystalline and amorphous solids 99

Silver
Application of differential charging for analysis of electronic properties of supported silver 7
Spin resolved photoelectron spectroscopy
Spin resolved photoemission study of oxygen on thin cobalt films 197
Synchrotron radiation
High-resolution study of the correlation satellites in photoelectron spectra of the rare gases 241

Thermal desorption spectroscopy
Different bonding configurations of the aromatic anhydride NDCA on Ni(111) and O/Ni(111): a photoemission and TDS study 75
Titanium
The polyimide (PMDA–ODA) titanium interface. Part 3. A theoretical study 209

Ultraviolet photoelectron spectroscopy
Initial oxidation of the Sc-on-Al(111) system, as studied by photoelectron spectroscopy 25

Valence photoemission spectrum
Theoretical and experimental studies of the valence photoemission spectrum of propionitrile 149
Valence-CI calculation
Autoionization spectroscopy of CO on metal oxide surfaces 155

Work function
Initial oxidation of the Sc-on-Al(111) system, as studied by photoelectron spectroscopy 25

X-ray emission spectrum
SCF-X_α-SW and X-ray emission study of the electronic structure of some phosphorus compounds 291
X-ray photoelectron spectroscopy
Application of differential charging for analysis of electronic properties of supported silver 7
Initial oxidation of the Sc-on-Al(111) system, as studied by photoelectron spectroscopy 25
XPS and EELS study of a quasicrystalline $Al_{70}Pd_{20}Mn_{10}$ alloy 233
X-ray photoelectron spectrum
Lineshape asymmetry parameters in X-ray photoelectron spectra 15
